

WHEELCHAIR HOIST

FOR MORE ACCESSIBILITY

Fleet Engineering Wheelchair Hoist

FLEET offers a simple and fully automatic solution for transporting wheelchairs in vehicles. The system is equipped with a remote-control switch, ensuring safety and providing a smooth, enjoyable mobility experience. This type of wheelchair lift gate is a hydraulic platform typically installed at the rear of a vehicle, allowing wheelchair users to be mechanically lifted in and out with ease. It is also convenient for lifting cargo in and out of the vehicle using the same system, making it a versatile solution for both personal and commercial use.

*****AUSTRALIA EXPORT QUALITY*****

OPERATION CONTROL

The control box is equipped with a cut-out switch that must be activated before use. A warning light on the hoist indicates when it is in operation.

For split platform models, operation is managed via a 4-button remote (Up, Down, Fold, Unfold). For safety, **the platform cannot be folded until it has been fully raised.**

Safety Hook

In the event of hydraulic oil leakage, a safety hook is in place to prevent the platform from falling.
